UC + Networking Convergence Solutions

Product Messaging - GCC Series

Tagline	An Extraordinary All-In-One Solution That Redefines the Communication Experience
Subhead	The GCC Series combines the functionality of 4 products to provide an all-in-one solution that includes a VPN router, next-generation firewall, IP PBX, and network switch or Wi-Fi access point
Target Audience	Small-to-Medium sized Businesses (GCC6010 Series) Medium-to-Large Businesses and Enterprises (GCC6020 Series)
Product Description	The GCC Series provides an extraordinary all-in-one solution that redefines the communications experience by merging your unified communications and networking solutions into one platform. These state-of-the-art devices combine the functionality of 4 products to provide an all-in-one solution that includes a VPN router, next-generation firewall, IP PBX, and network switch or Wi-Fi access point. With the GCC Series, you can create and manage wired, wireless, and VPN networks, provide enterprise-grade network security, and utilize a market-leading communication and collaboration platform. These flexible devices provide unified management and centralized control of all Grandstream endpoint solutions, including Wi-Fi APs, network switches, IP Phones, and more. The GCC Series allows full UC, networking, and security solutions to be configured in minutes and managed through the cloud with the Grandstream Device Management System (GDMS), and can also be managed through our mobile app, local Web UI, and CLI console management. Ideal for businesses of all sizes, the GCC Series provides an all-in-one platform that combines all business data, security, communication, and collaboration needs into one device – making it easier and more affordable than ever to build state-of-the-art communication solutions.
Customer Challenges	Every organization requires a communication and collaboration platform, wired and wireless networks, and network security. Traditionally, each of these critical business solutions have been separate platforms that are independent from each other, creating complicated networks that require lots of hardware, are complicated to manage and expensive to maintain. A business is looking for an easy-to-buy, easy-to-manage solution that combines all critical communication tools into one platform while providing business-grade reliability, performance, and security.
Customer Solutions	The GCC Series makes it easier and more affordable than ever to build state-of-the-art communication solutions that combine all business data, security, communication, and collaboration needs into one platform. With the GCC Series, you can create and manage wired, wireless, and VPN networks, provide enterprise-grade network security, and utilize a market-leading communication and collaboration platform. These extraordinary devices allow full UC, networking, and security solutions to be configured in minutes and managed through the cloud with the Grandstream Device Management System (GDMS), and can also be managed through our mobile app, local Web UI, and CLI console management.

Videos

Use these videos to promote the GCC series on your socials, or on your website. Video is a great option to get the target interest of the audience. When compared to a wordy text, it is pretty simple to comprehend. When you use video, you have the chance of being concise and grabbing your audience's attention right away.

GCC Series - UC + Networking Convergence Solutions Overview and Basics

About the GCC Series

The GCC6010 Series provides an extraordinary all-in-one solution that redefines the communications experience by merging your unified communications and networking solutions into one platform. These state-of-the-art devices combine the functionality of 4 products to provide an all-in-one solution that includes a VPN router, next-generation firewall, IP PBX, and network switch or Wi-Fi access point. With the GCC Series, you can create and manage wired, wireless, and VPN networks, provide enterprise-grade network security, and utilize a market-leading communication and collaboration platform. These flexible devices provide unified management and centralized control of all Grandstream endpoint solutions, including Wi-Fi APs, network switches, IP Phones, and more. The GCC Series allows full UC, networking, and security solutions to be configured in minutes and managed through the cloud with the Grandstream Device Management System (GDMS), and can also be managed through our mobile app, local Web UI, and CLI console management.

Product Positioning

Ideal for small-to-medium sized businesses, the GCC6010 Series provides an all-in-one platform that combines all business data, security, communication, and collaboration needs into one device - making it easier and more affordable than ever to build state-of-the-art communication solutions.

Gigabit
5 or 10 Gigabit ports and PoE/SFP ports on select models

Easy centralized configuration through GDMS

Built-in QoS for prioritization of network traffic

Competitive Features

- IP PBX capabilities provides voice and video communications for up to 100 users and 25 concurrent calls
- Enterprise-grade firewall feature provides anti-virus, layer 2-7 IDS/IPS, DPI, SSL detection, and more
- VPN router solution supports 2.5Gbps or 3Gbps to allow easy remote access to private networks
- Supports SD-WAN for improved network performance, increased security, and simplified network management
- Provides advanced security protection with encrypted traffic, secure boot, unique security certificates, and more
- Managed through the cloud (GDMS), mobile app, local Web UI, CLI, and SNMP

GCC Key Technical Specifications

	GCC6010	GWN6010(W) - Coming Soon	GWN6011 - Coming Soon
Network Protocol	IPv4, IPv6, IEEE802.1Q, IEEE 802.1p, IEEE802.1x, IEEE802.3, IEEE 802.3u, IEEE 802.3x, IEEE802.3ab		
Gigabit Ethernet Ports	2 x 2.5 Gigabit SFP ports, 5 Gigabit Ethernet ports - 4 of which are PoE out port	5x Gigabit Ethernet ports, WAN/LAN configurable, max 3x WAN	2 x 2.5 Gigabit SFP ports, 10 Gigabit Ethernet ports - 4 of which are PoE out port
QoS Capabilities	VLAN, TOS • Support multiple traffic classes, filter by port, IP address, DSCP, and policing • App QoS: Application/protocol monitoring and traffic statistics • VoIP Prioritization		
Firewall	DDNS, Port Forwarding, DMZ, UPnP, DoS & Spoofing defense, traffic rules, NAT • DPI, Anti-Virus, IPS/IDS, SSL deep inspection • Content Control: DNS Filtering, web url/class/key worlds filtering, application identification and control		
VPN	IPsec VPN Site-to-Site / Client-to-Site • PPTP/L2TP VPN Server / Client-to-Site • L2TP with IPsec VPN Server / Client-to-Site • IPsec Encryption: MD5,SHA-1,SHA2-256 • IPsec Authentication: MPPE,DES,3DES,AES • IPsec Key Exchange: IKE: Main/Aggressive Mode, Pre-shared Key, DH Groups 1/2/5/14 • IPsec Protocols: ESP, PFS DH Groups 1/2/5/14, DPD, Local/Remote ID: IP Address, FQDN • IPsec NAT Traversal • PPTP/L2TP Encryption: MPPE 40-bit, 128-bit, IPsec • PPTP/L2TP Authentication: MS-CHAPv1/2 • WireGuard®

UC + Networking Convergence Solutions

GCC6010 - GCC6010W - GCC6011

The GCC6010 Series provides an extraordinary all-in-one solution that redefines the communications experience by merging your unified communications and networking solutions into one platform. These state-of-the-art devices combine the functionality of 4 products to provide an all-in-one solution that includes a VPN router, next-generation firewall, IP PBX, and network switch or Wi-Fi access point. With the GCC Series, you can create and manage wired, wireless, and VPN networks, provide enterprise-grade network security, and utilize a market-leading communication and collaboration platform. These flexible devices provide unified management and centralized control of all Grandstream endpoint solutions, including Wi-Fi APs, network switches, IP Phones, and more. The GCC Series allows full UC, networking, and security solutions to be configured in minutes and managed through the cloud with the Grandstream Device Management System (GDMS), and can also be managed through our mobile app, local Web UI, and SSH console management. Ideal for small-to-medium sized businesses, the GCC6010 Series provides an all-in-one platform that combines all business data, security, communication, and collaboration needs into one device – making it easier and more affordable than ever to build state-of-the-art communication solutions.

Built-in IP PBX provides voice and video communications with advanced collaboration features

Built-in enterprise-grade firewall provides anti-virus, layer 3-7 IDS/IPS, DPI, SSL detection, and more

Built-in VPN router supports 2.5Gbps or 3Gbps to allow easy remote access to private networks

Gigabit

5 or 10 Gigabit ports provide a network switch; GCC6010/6011: 4x PoE out ports, 2x 2.5 Gigabit SFP ports

GCC6010W includes a built-in dual-band Wi-Fi 6 AP with 2x2 MIMO technology

Easily configure, deploy, and manage all Grandstream endpoint solutions from one central location

Provides advanced security protection with encrypted traffic, secure boot, unique security certificates, and more

Managed through the cloud (GDMS), mobile app, local WEB UI, SSH, and SNMP

Multiple WAN ports with load-balancing and failover to maximize connection reliability

UC + Networking Convergence Solutions

GCC6020 - GCC6021

The GCC6020 Series provides an extraordinary all-in-one solution that redefines the communications experience by merging your unified communications and networking solutions into one platform. These state-of-the-art devices combine the functionality of 4 products to provide an all-in-one solution that includes a VPN router, next-generation firewall, IP PBX, and network switch. With the GCC Series, you can create and manage wired, wireless, and VPN networks, provide enterprise-grade network security, and utilize a market-leading communication and collaboration platform. These flexible devices provide unified management and centralized control of all Grandstream endpoint solutions, including Wi-Fi APs, network switches, IP Phones, and more. The GCC Series allows full UC, networking, and security solutions to be configured in minutes and managed through the cloud with the Grandstream Device Management System (GDMS), and can also be managed through our mobile app, local Web UI, CLI and SSH console management. Ideal for small and medium businesses, the GCC6020 Series provides an all-in-one platform that combines all business data, security, communication, and collaboration needs into one device - making it easier than ever to build state-of-the-art communication solutions.

Built-in IP PBX provides voice and video communications with advanced collaboration features

Built-in enterprise-grade firewall provides anti-virus, layer 3-7 IDS/IPS, DPI, SSL detection, and more

Built-in VPN router supports 6.5Gbps or 10Gbps to allow easy remote access to private networks

Gigabit
4 or 16 Gigabit ports provide a network switch; 5 or 24 PoE out ports; both have 2.5 Gigabit and 10 Gigabit SFP+ ports

Enhanced reliability with support for hot standby High-Availability

Easily configure, deploy, and manage all Grandstream endpoint solutions from one central location

Provides advanced security protection with encrypted traffic, secure boot, unique security certificates, and more

Managed through the cloud (GDMS), mobile app, local WEB UI, SSH, SNMP and CLI

Multi WAN
Multiple WAN ports with load balancing and failover to maximize connection reliability
